SUBMISSION RESTRICTIONS

Competitors are allowed 3 submissions per 1 day.

Your next submission can be on Feb. 24, 2020 UTC.

EVALUATION METRIC

$$\text{MAE} = \frac{1}{n} \sum_{i=1}^n |f_i - y_i|$$

The metric used for this competition is mean absolute error. The absolute error is calculated for each label in the submission and then averaged across the labels. For more information on how to calculate MAE, see wikipedia (https://en.wikipedia.org/wiki/Mean_absolute_error), sklearn

(http://scikit-learn.org/stable/modules/generated/sklearn.metrics.mean_absolute_error.html) in Python or the Metrics (<http://cran.r-project.org/web/packages/AUC/index.html>) package in R. A lower score is better. The goal is to minimize MAE.

SHARE YOUR WORK!

(/competitions/44/showcase/add/)

Show off your skills! You can add a link to your work for this competition, whether that is on your blog, on GitHub, BitBucket, GitLab or anywhere else. This link will show up on the leaderboard and in your user profile if the competition is for fun or once the competition is over if there is a prize.
